

## FAMILY SAFE DRIVING PLEDGE

**Distracted driving is selfish and dangerous. It is not consistent with our family's values. **More than 10,000 people** are killed each year in the U.S. by distracted driving. As a family, we commit to keeping each other safe and making distraction-free driving part of our everyday lives.**

If parents drive without distraction, their children are more likely to also drive without distraction. Teens can also hold parents accountable when it comes to safe driving. Together, we can make safe driving a shared family commitment.

Accordingly, we promise to:

- Use the “Do Not Disturb” setting on our phones while driving.
- Drive without distraction and not look at our phones while driving.
- Obey posted speed limits.
- Welcome family members to respectfully speak up if they see distracted driving.
- Be a good role model for safe driving for friends and family.
